

PRESS RELEASE
Delhi Traffic Police

20 September 2026

CENTRAL RANGE TRAFFIC POLICE INTENSIFIES ACTION AGAINST IMPROPER AND ROADSIDE PARKING

As part of its sustained efforts to ensure smooth traffic movement and promote adherence to traffic regulations, Delhi Traffic Police, Central Range, undertakes regular enforcement against improper and roadside parking. In continuation of these efforts, an intensified enforcement drive was conducted from 14.09.2026 to 20.09.2026 with the objective of keeping carriageways clear, reducing parking-related congestion and ensuring safer and more orderly movement of traffic.

The drive covered major roads, commercial and market areas, busy intersections, traffic bottlenecks and other locations identified as vulnerable to improper and roadside parking across the Central Range. Special focus was placed on stretches witnessing recurrent violations and locations where unauthorized parking adversely affects traffic flow.

During the drive, **5,644 challans were issued** against vehicles found parked in violation of traffic regulations. In addition, **1,048 vehicles were clamped** for improper/roadside parking and causing obstruction to the smooth movement of traffic.

Northern Range Traffic Police Intensifies Special Enforcement Drive for Public Safety

Under the close supervision of DCP Traffic, Northern Range, intensified enforcement activities were carried out across the Northern Range Traffic area on Friday and Saturday to ensure road safety, regulate traffic movement and curb traffic violations.

During the enforcement drives, strict action was taken against violators committing various traffic offences. A total of **7534** violations were prosecuted during the two-day enforcement period.

The enforcement action included:

- **Without Helmet: 913 challans**
- **Wrong-Side Driving: 391 challans**
- **No Entry 329**
- **Dangerous Driving 166 challans**
- **Drunken Driving: 89 challans**

The intensified action focused on recurrent and obstructive parking violations, with particular emphasis on keeping carriageways clear and ensuring efficient utilization of available road space. Traffic personnel were deployed at identified locations to ensure compliance and facilitate orderly movement.

Delhi Traffic Police advises motorists to park only at designated parking spaces and refrain from parking at prohibited locations, particularly on carriageways, footpaths, intersections and near traffic signals. Improper parking not only causes inconvenience to other road users but also reduces available road space and contributes to traffic congestion.

The message is clear; improper and obstructive parking will invite strict enforcement. Delhi Traffic Police will continue sustained and focused action against such violations, with intensified enforcement throughout the Range, to strengthen road discipline and ensure smoother and safer movement of traffic.
